KAMPY'S KORNER

High school prepares students in areas far beyond the classroom curriculum. High school helps teach students to research, listen, collaborate, lead, be creative and innovative, and put forth consistent and prolonged time, effort, and hard work into activities, classes, and subjects that matter. High School is the perfect opportunity to figure out your strengths and interests and set yourself up for a future of success. Make the most of your time in high school by challenging yourself, forming relationships with teachers and other students and joining extra-curricular activities.

Seniors, make sure you take advantage the opportunities that high school offers. It is your last chance.

Juniors, you are now upperclass women and responsibilities come with this status. Be great role models and always live our Mercy values.

Sophomores, continue to meet new people and find your strengths.

Freshmen, get involved in your school. It is fun and pays great dividends.

It is a great time to be a WOLF! Be Known, Be Challenged, Be Great!
